

Early Years Pupil Premium Strategy Statement

This statement details our school's use of early years' pupil premium funding to help improve the attainment of our disadvantaged pupils.

It outlines our early years' pupil premium strategy, how we intend to spend the funding in this academic year and the effect that last year's spending of pupil premium had within our school.

School overview

Detail	Data
School name	Gracelands Nursery School
Number of pupils in school (October 2022 Census)	75
Proportion (%) of pupil premium eligible pupils	14/75 = 19% (29% of 49 x 3-4 year olds)
Academic year/years that our current pupil premium strategy plan covers (3 year plans are recommended)	2022-23, 2023-24, 2024-25
Date this statement was published	08/12/2022
Date on which it will be reviewed	Autumn 2023
Statement authorised by	Samantha Richards
Pupil premium lead	Samantha Richards
Governor / Trustee lead	Michelle Howles

Funding overview

Detail	Amount
Pupil premium funding allocation this academic year	£6507 (indicative)
Recovery premium funding allocation this academic year	£0
Pupil premium funding carried forward from previous years (enter £0 if not applicable)	£0
Total budget for this academic year If your school is an academy in a trust that pools this funding, state the amount available to your school this academic year	£6507 (indicative)

Part A: Pupil premium strategy plan

Statement of intent

Our intention is that all children, irrespective of their background or the challenges they face, make good progress and are on track in all areas of the Early Years Foundation Stage when they leave us to go to Primary School. The focus of our early years' pupil premium strategy is to support disadvantaged pupils to achieve that goal and close any gaps in their knowledge or skills.

We will consider the challenges faced by vulnerable pupils, such as those who have a social worker and children with special educational needs. The activity we have outlined in this statement is also intended to support their needs, regardless of whether they are disadvantaged or not.

High-quality teaching is at the heart of our approach, with a focus on areas in which disadvantaged pupils require the most support. This is proven to have the greatest impact on closing the disadvantage attainment gap and at the same time, will benefit the non-disadvantaged pupils in our school. Implicit in the intended outcomes detailed below, is the intention that non-disadvantaged pupils' attainment will be sustained and improved alongside progress for their disadvantaged peers.

Our approach will be responsive to each child's needs, informed by our 'All About Me' conversations with parents before children start nursery and ongoing observations and assessments of the child. Consistent access to outdoor learning has proved over many years to be an opportunity that targets many of the challenges our children face and helps them develop the attitudes, knowledge and skills they need to succeed at primary school. Rights respecting schools work, having children's rights embedded into our curriculum, has also shown to develop positive attitudes to learning.

We will base this and the other initiatives in a nursery curriculum and environment which is language-rich, nurturing and focuses first on the prime areas of learning. This will ensure that all children can fully assess all seven areas of learning at nursery and be ready and able to thrive in their Reception class when they leave us.

Challenges

This details the key challenges to achievement that we have identified among our disadvantaged pupils.

Challenge number	Detail of challenge
------------------	---------------------

1	<p>Disadvantaged pupils generally have lower levels of social communication skills than their peers.</p> <p>Among all children, post pandemic, the majority are arriving at Nursery with social communication skills below that expected of their age. Less children have attended social settings (applicable for disadvantaged children as well as all children as a result of the Covid-19 pandemic).</p>
2	<p>Disadvantaged pupils generally have lower levels of speech, language and vocabulary than their peers.</p> <p>Among all children, post pandemic, the majority are arriving at Nursery with language and a breadth of vocabulary that is below that expected of their age. This may be as a result of less social communication opportunities prior to attending Nursery.</p> <p>This may also be attributed to disadvantaged children having less access to books, enrichment activities and educational toys outside of school, thus impacting on language and vocabulary development.</p>
3	<p>Disadvantaged pupils and vulnerable pupils, often have less developed gross motor skills than that expected of their age.</p> <p>Our disadvantaged pupils often live in terraced housing with overcrowding. Many children do not have access to a garden and this can result in less developed gross motor skills and understanding of the natural world.</p> <p>Less developed gross motor skills can affect posture and the development of fine motor skills, significantly affecting writing ability in the later educational phase.</p> <p>(Shown through baseline assessments, observations of children and discussions with parents)</p>
4	<p>Among our disadvantaged pupils, a higher number have parents with mental health issues. This can negatively impact their own wellbeing and self-confidence. Children with lower levels of well-being often develop at a slower rate in all areas of learning and are often less susceptible to teaching/learning and lower engagement levels.</p> <p>Lower levels of mental health in parents (and children) may have been heightened by the Covid-19 pandemic.</p>
5	<p>Our disadvantaged children often come to nursery hungry and less able to concentrate on their learning, demonstrating lower engagement levels</p>
<p>(Shown through baseline assessments, Wellcomm assessments, observations of children, initial meetings with parents and ongoing informal discussions with parents)</p>	

Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan**, and how we will measure whether they have been achieved.

Intended outcome	Success criteria
Improved social communication skills	Children to have the gap closed in their communication and language abilities. Progress made in communication and language assessments by the time children leave nursery. Majority of children reaching age related expectations for communication and language.

Gracelands Nursery School 2022-2023

	<p>Children's social interactions become more advanced, matching those expected of their age by the time they leave Nursery.</p> <p>Children are exposed to and engage in high quality interactions with adults in the setting.</p>
Improved speech, language and vocabulary	<p>Reduced gap in children's Wellcomm score by at least one band by the time they leave nursery.</p>
Improved language, vocabulary and knowledge (through enrichment experiences and opportunities at nursery)	<p>Children are exposed to and use new vocabulary learnt through their everyday play and conversations, through consistent high quality indoor and outdoor experiences, high quality teaching, and through both internal and external enrichment opportunities.</p> <p>Improved language and vocabulary positively impacts all areas of learning, children's knowledge, children's confidence and children's social communication.</p>
Improved gross motor skills	<p>Children access opportunities daily, both indoors and outdoors, that positively impact their gross motor skills.</p> <p>Children's gross motor skills strengthen. They have increased control over their torso, larger muscle groups and limbs.</p> <p>Children are experienced and skilled in large scale movement, meeting age related expectation for gross motor area of learning.</p> <p>Where applicable, children are ready for the demands of table sitting, posture stamina and writing in the next phase of the education.</p>
Improved wellbeing and self-confidence (as seen through improved concentration, engagement and independence skills)	<p>Children demonstrate good engagement levels (Leuven scales used as a guide) and increasing independence skills are observed for all children</p> <p>Children are on track to / meet age related expectations in PSED when they leave nursery.</p>
Children are well-fed and ready to learn	<p>Children demonstrate a readiness to learn and an eagerness to learn.</p> <p>Children have access to toast, fruit and milk at Nursery.</p> <p>No child struggles with concentration as a result of being hungry.</p> <p>Children develop healthy eating habits which will stay with them for life.</p>

Activity in this academic year

This details how we intend to spend our pupil premium **this academic year** to address the challenges listed above.

Teaching (for example, CPD, recruitment and retention)

Budgeted cost: £4700

Activity	Evidence that supports this approach	Challenge number(s) addressed
<p>Consistent use of Wellcomm to improve language skills</p> <p>Ensure new staff are well trained in Wellcomm</p> <p>Explicit vocabulary teaching and modelling across the school</p>	<p>There is a strong evidence base that suggests oral language interventions, including dialogic activities such as high-quality classroom discussion, are inexpensive to implement with high impact on reading:</p> <p>Oral language interventions Toolkit Strand Education Endowment Foundation EEF</p> <p>EEF EYFS toolkit:</p> <p>Communication and language approaches  </p> <p><small>High impact for very low cost, based on extensive evidence.</small></p>	<p>1,2,4</p>
<p>CPD for staff</p> <p>Focus on</p> <ul style="list-style-type: none"> -language acquisition and strategies/ pedagogy for maximising language -developing children's vocabulary -social communication development. <p>(Including ongoing development of staff providing daily high-quality experiences indoors and outdoors and facilitating high-quality interactions)</p> <p>Use of Kim Scott training platform</p>	<p>There is strong evidence to suggest staff that are well-trained and have their pedagogy and knowledge developed are most likely to have the greatest impact on children's learning. This is particularly crucial with regards to knowledge of early child development for EY practitioners.</p> <p>Staff CPD:</p> <p>https://d2tic4wvo1iusb.cloudfront.net/eef-guidance-reports/effective-professional-development/EEF-Effective-Professional-Development-Guidance-Report.pdf?v=1672861015</p> <p>Vocabulary gap:</p> <p>'Children's vocabulary skills are linked to their economic backgrounds. By 3 years of age, there is a 30 million word gap between children from the wealthiest and poorest families.'</p> <p>https://www.naeyc.org/resources/pubs/tyc/feb2014/the-word-gap</p> <p>EEF EYFS toolkit:</p> <p>Communication and language approaches  </p> <p><small>High impact for very low cost, based on extensive evidence.</small></p>	<p>1,2,4</p>
<p>Ensure purposeful, high quality outdoor opportunities and resources to support high quality teaching and learning outdoors</p>	<p>There is strong evidence that shows that children's academic attainment, social development, language and communication and emotional well-being is increased as a result of good gross motor skills.</p> <p>Fundamental or gross motor skills (GMS) are the foundation for many sports and physical activities. From a health perspective, higher levels of GMS are associated with lower</p>	<p>3,4</p>

Gracelands Nursery School 2022-2023

<p>Improve outdoor resources to support development of gross motor skills (2022-23 & 2023-24)</p>	<p>body mass index better cardiorespiratory fitness and physical activity as well as enhanced cognitive development social development and language skills. Moreover, children with poor GMS are more likely to have lower self-esteem and higher levels of anxiety. GMS proficiency in young children is suboptimal and given the short-term and long-term consequences of poor skills, interventions targeting the improvement of these skills are needed. https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5117028/</p> <p>Gross motor skills affect wellbeing and give children opportunities to socialise in play. Confidence and coordination in gross motor skills are essential for children in developing their fine motor skills. https://help-for-early-years-providers.education.gov.uk/physical-development/gross-motor-skills#why-gross-motor-skills-are-important</p>	
<p>Purchase / plan for wider experience as part of the everyday curriculum offer activities e.g. real life experiences, real resources, hands on experiences, Living Eggs, author visit, artist focus</p>	<p>There is great value in showing children the awe and wonder of the world and making experiences possible that may not happen in their everyday lives. 'Children from disadvantaged backgrounds benefit from experiences and activities that they may not get out of school.' Ofsted's inspection framework emphasises the importance of personal development and extending the curriculum beyond academic achievement. It assesses schools on whether they:</p> <ul style="list-style-type: none"> • Help children develop their interests and talents • Enable children to develop their character, including resilience, confidence and independence • Teach children how to keep physically and mentally healthy • Prepare them for future success • Equip children to be responsible, respectful and active citizens <p>Enrichment experiences support language development, wider knowledge, emotional well-being and create memories that children can then connect to later experiences. https://www.eyalliance.org.uk/cultural-capital-eif-what-you-need-know</p> <p>Vocabulary gap: 'Children's vocabulary skills are linked to their economic backgrounds. By 3 years of age, there is a 30 million word gap between children from the wealthiest and poorest families.' https://www.naeyc.org/resources/pubs/tyc/feb2014/the-word-gap</p>	<p>1,2,4</p>
<p>Purchase and use a set of core books for big nursery and little nursery using the school's</p>	<p>There is strong evidence of the correlation between exposure to a range of high quality books and children's vocabulary and future academic attainment. http://ecommerce-prod.mheducation.com.s3.amazonaws.com/unitas/school/explore/sites/reading-wonders/evidence-based-strategies-</p>	<p>1,2,4</p>

<p>curriculum book spine</p>	<p>for-improving-childrens-vocabulary-knowledge-white-paper.pdf</p> <p>‘...for many children a lack of vocabulary puts up daily barriers that are difficult to overcome.’</p> <p>Teachers reported that pupils with low levels of vocabulary often:</p> <ul style="list-style-type: none"> • Had difficulty working independently. • Had difficulty following what is going on in class. • Achieved worse results in national assessments. • Made slower than expected progress in English. • Made slower than expected progress in other subjects. <p>Even more significantly, Charlton and Asmussen (2017) found that children with language difficulties at age 5 were:</p> <ul style="list-style-type: none"> • Four times more likely to have reading difficulties in adulthood. • Three times as likely to suffer from mental health problems. • Twice as likely to be unemployed in adulthood. <p>This picture is again backed up by the Oxford Language Report (2018), where teachers reported that pupils with lower levels of vocabulary were:</p> <ul style="list-style-type: none"> • More likely to suffer from low self-esteem. • Less likely to stay in education and less likely to be able to find employment at the end of their school journey. • More likely to show negative behaviour. • More likely to have difficulty making friends. • More likely to have worse attendance. <p>https://www.oneeducation.co.uk/news-blog/mind-the-gap-why-prioritising-vocabulary-matters</p> <p>Vocabulary gap: ‘Children’s vocabulary skills are linked to their economic backgrounds. By 3 years of age, there is a 30 million word gap between children from the wealthiest and poorest families.’</p> <p>https://www.naeyc.org/resources/pubs/tyc/feb2014/the-word-gap</p> <p>There is strong evidence of the correlation between exposure to a range of high quality books and the use of story developing wider knowledge in children.</p> <p>EEF EYFS toolkit:</p> <p>Early literacy approaches</p> <p>Moderate impact for very low cost, based on moderate evidence.</p> 	
------------------------------	--	--

Targeted academic support (for example, tutoring, one-to-one support structured interventions)

Budgeted cost: £1000

Activity	Evidence that supports this approach	Challenge number(s) addressed
<p>Adult led 1 to 1 / small group speech and language intervention / intense interactions</p>	<p>Evidence shows that small group tuition is effective and, as a rule of thumb, the smaller the group the better. Some studies suggest that greater feedback from the teacher, more sustained the engagement in smaller groups, or work which is more closely matched to learners' needs explains this impact.</p> <p>https://educationendowmentfoundation.org.uk/education-evidence/teaching-learning-toolkit/small-group-tuition</p> <p>There is a strong evidence base that suggests oral language interventions, including dialogic activities such as high-quality classroom discussion, are inexpensive to implement with high impacts on reading:</p> <p>Oral language interventions Toolkit Strand Education Endowment Foundation EEF</p> <p>EEF toolkit: Communication and language approaches  <small>High impact for very low cost, based on extensive evidence.</small></p>	<p>1,2,4</p>

Wider strategies (for example, related to attendance, behaviour, wellbeing)

Budgeted cost: £800

Activity	Evidence that supports this approach	Challenge number(s) addressed
<p>Breakfast provided to ensure children are fed and ready to learn</p>	<p>Young children are growing quickly and have high energy and nutrient requirements for their size. They also eat smaller amounts than older children and adults, so it is important for them to eat regular meals and snacks that contain sufficient energy and nutrients for their needs.</p> <p>The pilots for the universal free school infant meals by the DfE found that children eating healthy meals at school had improved performance in the classroom. Improvements in attainment were strongest amongst pupils from less affluent families and amongst those with lower prior attainment. They also found social and behavioural benefits from children who sat down to eat with friends and teachers</p> <p>https://www.parliament.uk/globalassets/documents/commons-committees/Education/evidence-check-forum/Universal-infant-free-school-meals.pdf</p>	<p>5</p>
<p>Fruit / vegetable sticks provided for snack mid-morning and mid-afternoon</p>	<p>Research confirms that healthy eating habits in the years before school are very important because they influence growth, development and academic achievement in later life</p>	<p>5</p>

	<p>Over a fifth of children are either overweight or obese by the time they join reception class in primary school</p> <p>Eat Better Start Better – Voluntary Food and Drink Guidelines for Early Years Settings in England:</p> <p>http://cft-staging-cdn.core-clients.co.uk.s3-eu-west-1.amazonaws.com/2015/06/CFT_Early_Years_Guide_Interactive_Sept-12.pdf</p>	
<p>Early Words Together Parent Courses</p>	<p>There is strong evidence that suggests that in the early years, programmes that encourage parents to engage with their children’s learning have a positive impact on their attainment.</p> <p>https://educationendowmentfoundation.org.uk/education-evidence/teaching-learning-toolkit/parental-engagement</p> <p>EEF EYFS toolkit:</p> <p>Parental engagement ££££££ ££££££ <small>Moderate impact for moderate cost, based on moderate evidence.</small></p> <p>Communication and language approaches ££££££ ££££££ <small>High impact for very low cost, based on extensive evidence.</small></p>	<p>1,2,4</p>
<p>Internal and external trips/ experiences/visits /visitors subsidised/paid for (vulnerable children)</p>	<p>There is great value in showing children the awe and wonder of the world and making experiences possible that may not happen in their everyday lives.</p> <p>‘Children from disadvantaged backgrounds benefit from experiences and activities that they may not get out of school.’</p> <p>Ofsted’s inspection framework emphasises the importance of personal development and extending the curriculum beyond academic achievement.</p> <p>It assesses schools on whether they:</p> <ul style="list-style-type: none"> • Help children develop their interests and talents • Enable children to develop their character, including resilience, confidence and independence • Teach children how to keep physically and mentally healthy • Prepare them for future success • Equip children to be responsible, respectful and active citizens <p>Enrichment experiences support language development, wider knowledge, emotional well-being and create memories that children can then connect to later experiences.</p> <p>https://www.eyalliance.org.uk/cultural-capital-eif-what-you-need-know</p> <p>Vocabulary gap:</p> <p>‘Children’s vocabulary skills are linked to their economic backgrounds. By 3 years of age, there is a 30 million word gap between children from the wealthiest and poorest families.’</p> <p>https://www.naeyc.org/resources/pubs/tyc/feb2014/the-word-gap</p>	<p>1,2,4</p>

Total budgeted cost: £6500

Part B: Review of outcomes in the previous academic year

Pupil premium strategy outcomes

This details the impact that our pupil premium activity had on pupils in the 2021 to 2022 academic year.

Autumn 21	Spring 22	Summer 22
11 EYPP children	21 EYPP children	27 EYPP children
Academic Year funding	£7884	

We have worked to support those families with EYPP children by providing them with teacher interventions, targeted support, small group work, extra nursery hours, nursery lunch and resources to take home. We continue to offer support to the families and children of Graceland's nursery school with the help of the EYPP funding.

Throughout the year, we tracked and monitored the experiences and progress of these children. Data shows that children made progress in comparison to their starting points.

Nursery 2 (big nursery)

Area of learning	Starting point Children who were age appropriate in their development 11 children	Midpoint Children who were age appropriate in their development 15 children	End of the year Children who were age appropriate in their development 18 children
Communication and language	50%	53%	83%
Personal, social and emotional	50%	67%	83%
Physical Development	58%	73%	89%
Literacy	33%	40%	78%
Mathematics	25%	40%	78%

Nursery 1 (little nursery)

Area of learning	Starting point Children who were age appropriate in their development 0 children	Midpoint Children who were age appropriate in their development 6 children	End of the year Children who were age appropriate in their development 9 children
Communication and language	There were 0 EYPP children in Autumn	50%	77%
Personal, social and emotional		50%	77%

Physical Development		50%	77%
----------------------	--	-----	-----

50% of EYPP children start working below their age expected development. Carefully planned activities have been designed to support each individual child to narrow any gaps and to support them to make the best possible progress. Class teachers are aware of all EYPP children and know how to scaffold and extend learning to build on children knowledge and support the children to make progress across all areas of learning. This resulted on average over 60% of EYPP children achieving age appropriate development at the midpoint assessments. This shows us that children have made some progress between the starting points and the Spring term. This progress was not as much as anticipated due to the first half of the Spring term being highly disrupted due to high numbers of Covid-19 cases which affected children, families and staff. The school had a two-week partial closure and was open to key worker and vulnerable families during this time. This affected the four new EYPP children settling in the breadth of the curriculum we were able to offer for the other children. The endpoint data shows that 77% of EYPP children achieved age appropriate development. This shows us that children made good progress from their starting points. Children with EYPP have had access to targeted creative sessions with our resident artist and you can see from the data that this has particular focused on children’s communication and language and physical development skills.

Communication, language and literacy was prioritised for our children following baseline observations and assessments, we noted how low these areas were and put in high quality support to ensure that the EYPP children made good progress. We ensured that our learning environments were secure and nurturing yet stimulating both indoors and outdoors with many open-ended and language rich opportunities for children to engage in experiences that enabled them to develop curiosity and initiate their own ideas. Resources were easily accessible so that children could be independent, boosting children’s self-esteem, developing confidence and encouraging perseverance and resilience. Children developed and built relationships and language through the support and modelling of staff.

Targeted Communication and Language Input:

- We planned for WellComm interventions to develop language skills. These took place within continuous provision, during targeted intervention groups and within group times.
- Children with speech and language difficulties were identified and all EYPP children had access to specifically planned intervention groups.
- Each targeted session had a cycle of observation, planning and implementation. Impact was moderated by our WellComm Communication Champion. Our evaluations informed our summative assessment.
- The Head of School, Nursery Teacher and Senior Nursery Manager supported staff to further develop their skills and strategies to maximise opportunities to develop children’s communication and language skills. This included sharing information about National strategies and modelling outstanding teaching in this area.
- We are part of the DLP project for delivering WellComm across the Locality
- Core books and rhymes are being developed to support with the learning of new vocabulary, understanding, listening and attention.

We provided opportunities for awe and wonder through meaningful and enriching learning experiences. The impact of our high quality teaching was that children’s knowledge built up over time and prior learning was consolidated through development of skills.

Gracelands Nursery School 2022-2023

We have worked to support those families with EYPP children by providing them with teacher interventions, targeted support, small group work, food parcels, food vouchers, resource packs and continue to offer support to the families and children of Gracelands Nursery school with the help of the EYPP funding.

Throughout the year, we have tracked and monitored the experiences and progress of these children. Data shows that children make accelerated progress in comparison to their starting points. Carefully planned activities had been designed to support each individual child to narrow any gaps and to support them to make the best possible progress. Class teachers were aware of all EYPP children and know how to scaffold and extend learning to build on children's knowledge and support good progress across all areas of learning.

The early words together program was also started to support children to develop their language skills. We worked with the parents to build their confidence to support their communication language and literacy skills at home. We offered online videos, teacher modelling and resources to our EYPP children. We have noted that the children who have participated have increased understanding and spoken language skills. Parents have felt more confident to support children and share books with them at home

We have encouraged the children to attend nursery as much as possible and kept in touch with these families through regular phone calls, tapestry observations, parent meetings, supporting families and referring them to other services when required.

Providing the children with this support through the EYPP funding helped to provide the best start in life and with their education really working to narrow the attainment gap.
